

THIS IS THE STORY OF LUXURY

SWITCH TO A BETTER WORLD

#Edition 2018

Luxury isn't just about how expensive things are. The element of beauty, its richness and functionality play a collective role. Sometimes luxury is one brilliant idea. That one idea that further helps to elaborate creating functional products. We at GM, understand how important experiences are, and that is what we inculcate in our designs. FourFive is about classic timeless forms to unconventional designs, we find inspiration from everything. We don't ignore the past. We take the best from it and combine it carefully with tomorrow.

It wouldn't be right to expect fascinating things from everyday life all the time. However, creating joyful experiences isn't out of our hands and it's the greatest luxury of all.

Celebrating new design

It's 2018 and this is our yet another progressive catalogue.

A catalogue with new designs, new products that come from an innovative technology. It's always a great feeling to come with something new before you. Especially when it comes with good experience and progressive impressions.

Since the beginning of the year 2000, our ambition has always been to create technology that not only looks good, but is functional and good value for money. We continue to have our own concepts, production and distribution while working closely with a few, select international suppliers who share our same strong commitment to high quality.

We have come a long way since we began. Now with more than 10,000 dealership stores around the country, we find our inspiration from the urban lifestyle, but our commitment to creating good, honest and useful design remains the same. A commitment that is shared by our dedicated team of product designers, graphic designers, production experts, dispatch team and all those involved in the process of producing a class-apart product that reaches the consumer.

We take this opportunity to say a thank you to all our channel partners and customers spread across the nation. We are committed to listening to you, guide you and always seek the best solution for you. We hope we are able to bring you the finest lifestyle with our products and accessories. Hope turning these pages bring you new inspirations and assurance that our bond of years has been put to good use.

Thank you.

From the extensive range, the foremost idea is to ensure that the choices remain distinct despite the many colour options and texture options. Every mood is different and is conveyed differently, the expression of red varies from what white wants to convey. Sometimes colours and contrasts set the tone, sometimes it's the mix of materials.

**EXPRESS WHAT'S
WITHIN YOUR HEART.**

COLOURS & MATERIALS

We respond instantly and instinctively to colour. The hues of orange give you the warmth and the shades of blue that cools your mood. Red that excites the passion and white that settles you in peace. Colours have that energy to make a design speak.

Article and cover plates Customization

Often, the market requests the possibility to personalize the front part of the covers with symbols or inscriptions, or the personalization of the front plates with identifying marks. These marks are required to enhance the prestige and image.

GM offers the possibility to produce inscriptions, symbols, logos or special marks on the articles or cover plates. The personalization is done by laser technology.

Laser technology allows the reproduction of any name, logotype or trademark, with absolute precision and indelibility even for small quantities.
